

NuPremium Garden Mix is regarded as the Ultimate Garden Mix. It is a result of NuGrow's advanced Screening Process combined with NuCompost to give gardens the ultimate growing results.

Technical Specifications

NuPremium Garden Mix conforms to Australia Standards (AS4419) and can be utilized in most planting applications due to its balanced, plant available nutrient profile. Test results are available on request to ensure the best possible results for your site specific nursery stock.

Applications and Uses

NuPremium Garden Mix is suitable for small and large garden projects. **NuPremium** offers greater performance in general growing situations. **NuPremium** also provides piece of mind that you have used the highest performing mix in the NuGrow range. For particular applications such as low P materials and shrubs you should consult your soil advisor or landscape architect.
